The California Department of Transportation (Caltrans) announces contractor, **Vanguard Construction, Livermore, CA** will be initiating striping operations and installing concrete k-railing for three (3) nights beginning Sunday, June 29th as part of a new concrete barrier and sound wall reconstruction project at the southbound SR 41 to westbound SR180 connector.(See Project Map)

This improvement project will remove the existing metal beam guardrail and replace it with a new concrete barrier from the Olive Avenue undercrossing to just west of the Blackstone Avenue undercrossing. This \$1.2 million project is anticipated to be completed in winter 2015 and will also include new irrigation and highway planting.

Motorists may access westbound SR 180 from southbound SR 41 by utilizing the following detour during full closures as a result of this project:

- Continue southbound on SR41 to eastbound SR180 connector ramp; continue east and exit at Cedar Avenue; turn right; access the Cedar Avenue westbound SR 180 on-ramp connector.

These scheduled closure dates are subject to change due to unforeseen circumstances that may occur during construction, such as early completion etc. During upcoming construction phases, this project will be subject to additional intermittent ramp closures in order to safely complete this project.

Portable message signage will be in place advising motorists of the closure. Motorists are advised to watch for highway workers and to adhere to all closure signage. Caltrans would like to thank the local residents, businesses and commuters for their patience and reminds you to drive with extra care within all work zones.
